OBJECTIVE

AIML undergraduate with hands-on experience in Software development, ML, and NLP. Strong Python/Java background, proven project execution in AI, and skilled at translating business needs into data-driven solutions.

SKILLS

- **Programming Languages** | Python(2+,Advanced) • Java (1+,year) • SQL
- **ML/DS** | NLP • Generative AI • Machine Learning • Deep Learning
- **Frameworks** |Spring Boot • Django • TensorFlow • Scikit-learn
- **Data Tools** | Pandas • NumPy • Matplotlib • Seaborn
- **Cloud/Deployment** | Google Cloud • APIs • AWS
- **Soft Skills** | Communication • Problem-Solving and Critical Thinking • Independent + Teamwork experience

EDUCATION

- **Bachelor of Engineering in Artificial Intelligence and Machine Learning** (October 2022 - July 2026)
New Horizon College of Engineering, Bengaluru,Karnataka. **CGPA - 9.04/10**
- **Pre-University Course (PUC), Science (PCMC)** (June 2020 - March 2022)
SIR M V PU College, Davanagere, Karnataka. **Percentage - 92.3%**
- **Secondary School(CBSE 10th Grade)** (March 2020)
J S S Public School, HuvinaHadagali, Vijayanagar, Karnataka. **Percentage - 85.6%**

PROJECTS

- **Hyperspectral And Thermal Anomaly Detection Using Deep Learning (MAY 2025 - AUGUST 2025)**
 - Creating a two deep learning models which is used to detect real time anomallies from the UAVs data For precision of 85% and real time striking capabilities.
 - The model is the combination of GANS, AutoEncoders and GRU which enables the model for these capabilities.Also the model can detect environmental changes.
 - **Tech Stack** | • TensorFlow • PyTorch • GANS • LSTM • GRU • Matplotlib
- **An Empathy AI For Emotional Support and Psychological Profiling (Dec 2024 - April 2025)**
 - Chatbot which detects the tone of users from the conversation using NLP ,sentiment analysis and Agents to analyze and judge their current mood so LLM communicates according to users providing emotional support.
 - Mainly aimed for Psychological Profiling by Psychologists to their patients to understand them and provide therapy according to. The correctness of the model is determined to be around 82% given by Psychologists .
 - **Tech Stack** | •SpringBoot • RAG • Agentic AI
- **A Medical Tourism Platform. (June 2024 - Dec 2024)**
 - Developed ML-driven recommendation and chatbot system to guide medical tourists; optimized booking processes and reduced manual queries by 40%.
 - **Tech Stack** | • Django • API • LLM(Gemini AI) • RAG • K-Nearest-Neighbor
 - **NOTE** | This project's patent form is filed.

CERTIFICATIONS

- Google Cloud certification on AI Agents.
- IBM certification on Data Science Fundamentals
- NPTEL certification on Operating Systems.
